EDUCATION

**Bachelor of Computer
Engineering & Digital Technology**
Chulalongkorn University

Relevant coursework:

- Data Science & Machine Learning
- Software Engineering
- Database Systems

ABOUT ME

- I am a Computer Engineering and Digital Technology student at Chulalongkorn University with hands-on experience in data engineering and full-stack web development.
- I have worked on building web applications, designing data pipelines, and transforming raw data into actionable insights.
- I am seeking a Data Engineer internship, where I can work on data pipelines, ETL processes, and analytics systems.

Technical Skills

Data Engineering

- **Data sources & Ingestion:**
 - Relational DB, REST APIs, CSV/JSON (Python, Airflow, Kafka)
- **Storage & ETL:**
 - Data Lake / Warehouse, data cleaning and transformation
 - (SQL, Pandas, Spark / PySpark)
- **Analytics / ML:** EDA, basic ML pipeline
 - (Python, Spark ML, MLflow)
- **Visualization:**
 - (Power BI, Tableau, Streamlit)

Tech Stack: Python, SQL | Pandas, Spark / PySpark | Airflow, Kafka
PostgreSQL | Git, GitHub | FastAPI | React, Next.js

SELECTED PROJECT

JobScope – Job Market Analytics & Recommendation System

- Built an end-to-end data pipeline for 120K+ job postings, optimizing memory usage by ~90% to meet cloud deployment constraints.
- Developed a Streamlit dashboard for job market analytics and skill-based job recommendations.

Tech Stack: Python, Pandas, Parquet, Streamlit, Scikit-learn, Git

WORK EXPERIENCE

Web Developer Intern – Year 1 Internship **RELEARN SOLUTION CO., LTD.**

Pasona360 Project

- Developed and enhanced web application features using Next.js, collaborating with designers and developers to deliver user-facing features aligned with business requirements.

Social Security Office of Thailand (sso.go.th)

- Developed frontend interfaces (Next.js) and backend services (Java Spring Boot) for government web systems, delivering features on schedule.
